

BSA LifeStructures

UCHealth Steadman Hawkins Clinic Denver. Photo: Caleb Tkach, AIAP

BSA LifeStructures was originally founded as Boyd/Sobieray Associates, Inc. from the merger of an engineering and architectural firm. Today, BSA LifeStructures (BSA), a national, integrated design firm, creates inspired solutions that improve lives – what the firm describes as LifeStructures.

Creating a LifeStructure is about supporting the people who heal, learn and discover within the space. It's about patients, physicians, nurses and others who provide healthcare services. It's about students and teachers. It's about researchers and the people who will benefit from their discoveries. It takes skill, knowledge, passion, research and talent to create a place that truly helps to improve health, assists in the teaching process and inspires new discoveries.
